

Use Case: Browsing Message

Actors:

- User
- Client
- Server

Use Case Description: After the user has chosen a message from the message board to load that message will be drawn for them in a way that makes it easy to see all the details. From there they can return to the message board or accept/sign up for the trip.

Use Case: Browsing Account

Actors:

- User
- Client
- Server

Use Case Description: After the user has chosen to view his own account or someone else's that account will be drawn out for them. Viewing the user's own profile will vary from viewing other's in what is viewable and what options are available. They can either change settings from here or return to where they were.

Use Case: Accept a request

Actors:

- User
- Client
- Server

Use Case Description: Once the user has chosen to view a request and chosen to sign up the user will be inserted into the trip if the trip hasn't reached capacity since the last time the client refreshed the message board.

Use Case: Post A Request

Actors:

- User
- Client
- Server

After a user has chosen to post an offer the offer form will be provided so that they can insert information. Then as long as the required information is valid the post will be inserted into the database and the client will refresh the message board after reporting success.
